

**Group number: 15**

**Name of the Project: Swiftly**

**Team members:**

**Guillermo García Pérez**

**Rohit Anantha**

**Eder Martínez**

**Akin Bilen**

**Dependencies: Xcode 15.3, Swift 5, Firebase 10.22.1**

**Special Instructions: N/A**

**Features:**

Features	Description	Release Planned	Release Actual	Deviations	Who/Percentage worked on
Account Creation	Allows user to create and sign in to account	Final	Alpha	N/A	Rohit (20%) Akin (80%)
Account manipulation	Update username/password/data, and delete account	Final	Alpha/Beta	We pulled this forward in order to help with our timeline	Rohit (80%) Eder (20%)
Lesson	Lesson types and lesson screens	Alpha	Continuous	We did not have code writing as a question type.	Guillermo(90%) Eder (10%)
Lesson Content	Actual info in the chapters	Alpha	Continuous	We added more content as we passed through the different stages	Rohit (75%) Eder (25%)
Users	Scoring, Leaderboard, Usernames, Streaks, etc	Beta	Beta	We changed from a percentage completion format to a scoring format	Akin (50%) Guillermo (50%)

UI/UX	Colors, Animation, Styling, Font, Logo, Transitions	Continuous	Continuous	Since we didn't plan the UI/UX features out fully in the proposal, we had to do a lot of decision-making as we went.	Rohit (90%) Akin (10%)
Settings	Dark / Light Mode, Language, Ratings, Account Settings	Beta	Final	We had to push these features, as we wanted to get more critical features done first	Akin (70%) Rohit (30%)
Flexible Lesson Structure	Project Structure that ensured ease when adding lessons or questions to lessons	Alpha	Alpha	We added some restrictions to the lessons, for example: lesson must end in a results screen and it must not start with a question	Guillermo 70% Akin 30%
